

NEEDS SCHEDULING ADVICE?

Did you know that DFM also offer scheduling services?

DFM have a 20 year of experience scheduling using DFM Soil moisture probes. If you need expert advise please do not hesitate to contact us for assistance.

Let us assist you to practically implement and manage Oxygen to plant roots. Our three scheduling packages have been created.

Platinum - Weekly Farm visit

Gold - Every two weeks Farm Visit

Silver - Once a month Farm visit.

For more information or to book a consultant please contact our Cape Town branch at 021 - 904 1154 or send us a mail at info@dfmsoftware.co.za

The image shows three screenshots of the DFM Probe Utilities software interface. The top-left screenshot displays a multi-line graph with various colored areas representing different data series over time. The top-right screenshot shows a data table with columns for various parameters and values. The bottom-left screenshot shows a table with columns for 'Area', 'Block', 'Crops', 'Water', 'Irrigation', and 'Response', containing numerical data.

DFM **DFM Probe**
utilities
A Product of DFM Software Solutions co. 2011

The DFM Probe Utilities software package is used to interpret the soil moisture content and temperatures of the DFM Continuous Logging Soil Moisture Probes. With the use of the accurate information from the probes, informed irrigation decisions can be made and implemented.

Add On package for MB4000

- Scouting or Presence per inspection
- Count per trap

Smart technologies for a **more productive**
and much more **efficient** agriculture

If you are unfamiliar with our Powerful Farm Management program please ensure to ask us about it.

The MB4000 package includes planting details, growth stages, and irrigation and spray records. In short, accurate record keeping. More important this system will help the farmer with cost savings and he will be able (with these accurate records) to never spend more money than he has to.

The main feature found in MB4000: the ability to create a spray instruction in less than 15 seconds saves you time, money and even more importantly, less chemical wastage. With full comprehensive reports and spray instruction guides, GlobalGAP is made easier than ever before.

Interested in a Demo!! Contact us and we can arrange it for you.

Happy Holidays from all of us here at DFM Technologies!!
